

Science in a Van - Wednesday 30th August

Dear Parents/Caregivers

This term we are excited to have 'Science in a Van' visiting our school. This is an exciting roadshow experience which will be a fun, interactive and memorable way for students to see and engage with science.

9.20-9.40	Science Stunt for the whole school
9.50-10.35	What's the Matter? (Team Falcon/Tui) What are the properties of a material? What are the three states of matter? Can they change from one state to another? This experience will get students excited about solids, liquids and gases. It introduces the periodic table in a fun way and demonstrates how elements can come together to make different materials. We discuss how materials can change with mixing and temperature and enjoy explosive experiments!
11.40-12.25	The Wonderful World of Bubbles (Team Fantail/Pukeko) This experience facilitates exploration of identifying, classifying and investigating materials. Students will get an understanding of mixtures, how they can separate and how they can come together to create a reaction! During this show we journey together through the scientific process of guessing (predicting), trying it out (testing), and seeing what happens (making observations).

The cost is \$4 per student .

***Whanau, you are welcome to come along and share the experience at no extra cost.
Please join us!***

Science in a Van - Wednesday 30th August

Student name: _____ Room _____

Do any additional family members wish to attend? YES NO

If yes, how many seats will be required (not including student)? _____

The cost is \$4.

I have enclosed payment of \$.....

I have paid by Kindo \$.....

Please return to the office
